EXPECTED OUTCOMES

- Increased EU MS implementation of the TPD through the provision of support and technical/scientific capacity to EU regulators
- Increased EU MS regulator training through the provision of capacity building (toolkits, e-learning)
- Common approach on handling tobacco products evidence based decisions across EU MS, within the context of their national legislative approach
- Increased data sharing and collaborations between EU MS on tobacco product regulatory science
- Responses to questions on "burning topics" as brought forward by EU MS regulators
- Increased literacy on tobacco products design, constituents and toxicity by regulators and the public
- Close monitoring of e-cigarette compliance to the TPD across the EU MS
- Increased knowledge of e-cigarette design parameters, ingredients and emissions
- Enhanced collaborations between EU MS laboratories for tobacco products ingredients and emissions measurements
- Increased scientific scrutiny and decisions on potential priority additives within tobacco products
- Greater access to data on tobacco products and e-cigarettes, in order to fuel general population awareness and enhance research and policy actions. The provision of such public data will be an unprecedented opportunity for tobacco control research.

JATC

JOINT ACTION ON
TOBACCO
CONTROL

www.jaotc.eu

GENERAL OBJECTIVE

Support the implementation of the Tobacco Products Directive throughout the 28 EU MS

The TPD aims to preserve a high level of European public health and support the functioning of the internal market of tobacco products in the EU

Provide regulation of

- tobacco products
- novel tobacco products
- electronic cigarette products

The JATC is a collaborative action between the European Commission and the EU Member States built on evidence-based tobacco control policies with the overarching aim to be implemented at a national, regional and European level in order to improve Public Health protection in the EU.

SPECIFIC AIMS

- Support the dissemination of information to the target groups
- Enhance the ease of access to the data collected, through the EU Common Entry Gate
- Monitor and provide support to the tasks of tobacco and e-cigarette products regulations
- Assist EU MS networking and enhance collaborations between laboratories for tobacco evaluation
- Support EU MS in the process of monitoring and updating priority additives
- Integrate the JATC results into national policies

TARGET GROUPS

- EU Regulators and national policymakers
- International and National Tobacco control stakeholders
- Researchers
- General public
