# OUR PETITION

1

Promote the first tobacco-free European generation by 2028, ending the sale of tobacco and nicotine products to citizens born since 2010.

2

Create an European Net of tobacco-free and butts-free beaches and riverbanks, making this spaces more healthy and environmentally sustainable.

3

Establish an European Net of tobacco-free and butts-free National Parks making them more healthy and reducing contamination and risk of fires.

4

Eliminate tobacco advertising and presence in audiovisual productions, social media, specially addressing covert advertising through influencers and product placement.

5

Extend outdoor smoke and vapor free spaces, especially those frequented by minors (parks, swimming pools, sports events and centers, shows and restaurants terraces).

6

Finance R&D projects for diseases caused by tobacco use to improve their prognosis and make them curable.

**PER UN'EUROPA SENZA TABACCO**

Per salvare la nuova generazione dalla dipendenza dal tabacco, contrastare con decisione i danni ambientali causati dai emissioni di sigarette e battere contro il fumo è necessario:

- Promuovere la prima generazione europea libera dal tabacco entro il 2030, mettendo fine alla vendita di prodotti del tabacco a base di nicotina ai cittadini europei dal 2020.
- Creare una rete europea di spiagge e rive fluviali libere dal tabacco e da emissioni, affinché questi spazi siano più sani e sostenibili dal punto di vista ambientale.
- Stabilire una rete europea di parchi nazionali liberi dal tabacco e da emissioni, per impedirgli di essere in vendita in cantine e ristoranti e il ricambio di ricambi.
- Ampliare gli spazi in cui è vietato fumare sigarette o sigarette elettroniche, specialmente negli frequentati dai minori (parchi, piscine, eventi e centri sportivi, sportelli e centri di ristorazione).
- Eliminare la pubblicità dei prodotti del tabacco e la loro presenza nelle produzioni audiovisive e nei social media, intervenendo in particolare sulla pubblicità occulta di bilancio e sui trattamenti di prodotti.
- Finanziare progetti di ricerca e sviluppo sulle relazioni causate dal consumo di tabacco per migliorare la diagnosi e rendere curabili.

**Sign for a healthier EU**

The European Citizens Initiative "Tobacco Free Europe" or ECI-TFE calls for a better world, better health, and better environments free from the dangers of tobacco use. It was accepted by the European Commission last year and is ready to move forward with the recommendations proposed by this Initiative. 7 petition statements of support must be collected within 1 year and meet the specific conditions and criteria of the European Commission.

Advancing Tobacco-Free Europe is one of the top priorities of the Europe's Beating Cancer Plan as described in the "Smoking Ends" through sustainable cancer prevention pillar. This will be achieved through the rigorous enforcement measures of the EU tobacco control legislation and its adaptation to new developments and market trends, including tighter rules on novel products which are expected this year.

Prevention is better than cure and next generations' health is in our hands: Be active! Sign here.

https://efip.network

**Objectives**  
Tobacco pandemic is the first avoidable cause of death, but on beaches environmental damage to the clean and its wildlife, in forests cause fire and contaminated soil and water. To save the new generations from falling into tobacco addiction, in addition to acting effectively against the environmental dangers caused by cigarette butts and fighting against smoking, it is necessary to:

1. Promote the first tobacco-free European generation by 2030, ending the sale of tobacco and nicotine products to citizens born since 2020.
2. Create a European Net of tobacco-free and built-free beaches and courtyards, making these spaces more healthy and environmentally sustainable.
3. Establish a European Net of tobacco-free built-free National Parks making them more healthy and reducing contamination and risk of fires.
4. Extend outdoor smoke and vapor-free spaces, especially those frequented by minors (parks, swimming pools, sports events and centers, schools, and restaurants terraces).
5. Eliminate tobacco advertising and presence in audiovisual productions, and social media, especially addressing content advertising through placement and product placement.
6. Finance research for diseases caused by tobacco use to improve their prognosis and make them curable.

AVANZAMOS A LOGRAR UN ENTORNO SIN TABACO Y LA PRIMERA GENERACIÓN EUROPEA LIBRE DE TABACO DE AGO A 2030

Formando esta iniciativa, contribuimos a que Canarias y el resto de Europa estén libres del humo del tabaco y de sus nuevos productos con nicotina (cigarrillos electrónicos y vapeadores), y a que tus hijos no caigan en la adicción.

¿QUÉ PODEMOS CONSEGUIR SI LLEGAMOS AL MILLÓN DE FIRMAS?

- Abolir progresivamente la venta de tabaco y nicotina a las generaciones nacidas a partir del 1 de enero de 2020.
- Impulsar en toda Europa regulaciones destinadas a ampliar los espacios libres de humo y vapores al aire libre, especialmente los frecuentados por menores (parques, piscinas, actos y centros deportivos, espectáculos y terrazas de bares y restaurantes).

**SZAKMAI HÍREK**

### Tegyünk együtt a dohánymentes európai generáció és környezet eléréséért!

*Let's work together for a tobacco-free European generation and environment!*

Szerző: [Páncs Melina](#)

**Kulcsszavak:** dohányzás; e-cigaretta; prevenció; dohányzás-ellenes szabályozás; környezetvédelem  
**Keywords:** tobacco use; vaping; prevention; tobacco control; environmental protection

A Dohánymentes Európaért Kezdeményezés Európa jelenleg legnagyobb dohányzás-ellenes civil kezdeményezése. Célja egyrészt a dohány- és nikotinos termékek értékesítésének megszüntetése a 2010. után született generációk számára, másrészt a dohánytermékek által a természetben (vízi- és szárazföldi élővilágban) okozott károk elleni együttes európai fellépés.

A dohányzás világszerte a leginkább megelőzhető haláloknak számít. Magyarországon a halálozások ~20%-át az aktív vagy passzív dohányzás a felelős. Az egészséges életek elvesztésének és a korai halálozásnak hazánkban a dohányzás a legjelentősebb kockázati tényezője. A dohányzók túlnyomó többsége már serdülőkorában a nikotin rabjává válik, ezért kiemelt jelentőségű, hogy az új, fiatal generációkat megóvjuk a dohány- és nikotinfüggőségtől.

A dohányzás nemcsak az egészségre, de a környezetre is súlyosan ártalmas. A csikkak az egyik leggyakoribb hulladéktípusnak számítanak a Földön. A csikkak és elektronikus dohány/nikotinhevítő eszközök rengeteg mérgező vegyületet (pl. nikotin, nehézfémek, műanyagok) tartalmaznak, amelyek a talajt, levegőt, vizeket, a növény- és állatvilágot egyaránt károsítják. A cigarettákban és

hevítőrudakban lévő filterek műanyagok, ezek pedig csak hosszú évek alatt bomlanak le mikroműanyagokra, amelyek elsősorban a vizeket és vízi élővilágot szennyezik, közvetve pedig az embereket is.

**6 OK, AMIÉRT ÉRDEMES ALÁÍRNI A DOHÁNYMENTES EURÓPAÉRT KEZDEMÉNYEZÉST**

1. ENYHÍTENI A DOHÁNYZÁS KOCKÁZATÁT

# PROBLEMS

- **Lack of time** → 1 year is a short period to collect one million signatures:
  - First, the organizers have no experience, so the first months are a time for learning.
  - Secondly, the help of many organizations is needed, and it was difficult to achieve their collaboration until the signature collection system was already running and they could see with their own eyes how it worked and what was the initiative about.
- **Lack of financial resources**
  - Gathering a million signatures in a full-time job that requires a powerful team in, at least, each of the 7 countries required by the European Commission. Those teams need to be working daily on promoting the initiative without dedicating themselves to anything else and, unfortunately, few average citizens can afford to do this without being paid and we didn't have the funds to pay those teams.
  - On the other hand, money is also necessary to hire professional external services (designing, production, printing and positioning of materials, community management, communications agency, etc.).
- **Lack of capacity**
  - The organizers and collaborators had to include this activity in their already busy work, and it was not easy to dedicate the required energy and time so there weren't enough people dedicated to disseminating the initiative
  - We weren't able to recruit the army of constant volunteers required to collect one million signatures

# DIFFICULTIES

- **Explain in the media where and how to sign the initiative:** when interviewed on radio, TV programs, news, journals, it was difficult to explain how to go to the website where to sign because the link given by the commission was long and impossible to remember (we learned how to solve that months later), or the journals did not provide the QR code to directly go to the website. This contributed to the challenges in the dissemination of the initiative.
- **The steady collaboration of other organizations and entities:** We realized that a lot of people told us they were interested, or that this was a nice initiative, but then, even if we provided documentation or dissemination, they did not help us with the spread of the news at all or in a constant way.
- **The digital gap:** The online signature form was easy. However, it's a challenge for older people (that you do not reach in person) or less educated people who could have difficulties in this, also because personal identification data are requested (this was a challenge when you told people which info you needed for the signature).
- **Our initiative was too wide:** when we tried to collect signatures in person, it took so much time to tell people all the points of our initiative and how to sign.

# CONCLUSIONS

- The ECI-TFE won't gather 1 million signatures within the year.
- The organizers will take the necessary steps to avoid the USECESSFULL COLLECTION tag.
- Anyhow the ECI-TFE has achieved an important raise of awareness regarding the **ENDGAME** concept of "TOBACCO-FREE GENERATION" at least among the tobacco control community

# LESSONS LEARN

- Before starting a new European Citizens Initiative with chances to be successful it's really needed to:
  1. have financial resources
  2. Be less ambitious in the petition (less wide) and be more concrete (just go for one very important goal)
